

# Academic Lyceum named after G.A. Psahier

Student: Tkachuk Tatiana  
Form: 9 alpha  
Teacher: Razenkova T.P.

# History of our Lyceum

For the first time our school opened its doors in 1980, then the school was headed by Grigory Abramovich Psakhie. It was the first school in Akademgorodok, conceived for the training and development of future scientists and colleagues of such close institutions.

Gradually, a lyceum based on the school in 1991. Then there were only 4 classes, but the beginning of the growth of our second home was laid.

Since that time, several directors have changed, but traditions and development are still honored within the walls of the lyceum.

# Lyceum activity

Our lyceum provides an opportunity to develop not only to get knowledge of the educational program. It develops the spiritual, social and creative abilities of students.

There are self-government and volunteer organizations such as the “Civic Club”, under which wing the “New Generation” is growing. The school has various societies: theater, art, a whole music school and sports sections.

# Our education

But no one forgets about the main tasks - the presence of societies in mathematics, physics, chemistry, literature and so on.

Thanks to the strong teaching staff, who become the second family for pupils, the names of the graduates of the Lyceum can be heard in various spheres, and every year students appear more and more in the arena of Olympiads and various contests and competitions.

The school prepares adults, ethical members of society, so children grow up into students of prestigious universities in the country and the world

Each school takes a significant part of the people. Teachers and students leave memories of these times for years to come. For some, these are the only memories, while others live them year after year with new, already grown personalities. Lyceum is a big part of many lives.
