

open doors day at the

Academic Lyceum

Short introductory presentation

ΑΚΑΔΕΜΑΙΟΥΣ

What is Academic Lyceum?

Academic Lyceum is municipal budgetary educational institution.

Our school's motto is

Ad augusta per angusta // To the top through the thorns

The logo of our Lyceum shows a young tree and a Moebius ribbon, symbolizing the growth and development of Lyceum students.

And these are the basic principles of the institution.

The first building.

Our school has two buildings. The first (main) building is located at 8 Vavilova street. It's smaller and older than the second one, but it is cozy and has everything you need for comfortable learning.

We have:

- creative, smart and highly qualified teachers
- good library
- medical and psychological help
- computers and up-to-date equipment
- music, sports, art societies
- sports hall
- Assembly hall
- and on the courtyard flowerbeds and a small sports area

The new building.

The second (new) building is much bigger, just huge! Its address is 4 Designers street. It hosts scientific conferences and other events that need a lot of space, super-modern equipment or a large number of students.

(I was there only twice, so there is so little information...)

There are:

- bright classrooms
- a robotics office
- gym, games, sports, reading and Assembly halls
- a ski base
- a dining room
- a medical office

What is a Civic club?

The Civic club is the student self-government of an Academic Lyceum. They are engaged in such activities as organizing events and informing students about it, creating competitions within the school, charity and other social activities.

There are many different commissions involved in different activities:

- Fotomen
- Regulatory and legal block
- Design Commission
- Discussion club
- Coeval Club
- Sports and health Commission
- Discipline and order
- Altruist
- IT Commission

ГК

I have been a member of the civic club since last year as a photoman and I provide photo reports at most events. Sometimes I help with organizing quizzes for primary and secondary classes.

Scientific conferences.

The Academic Lyceum holds annual scientific conferences among students. However, students from other schools can also take part! The task of the participant is to conduct research, prepare a presentation on a common topic for everyone for their favorite subject, and make a speech.

The last one was the XXVI (16th) on the common topic "Dialectics" and about 430 students took part in it.

There were subject such as:

- English
- German and French
- health care
- physics and astronomy
- artistic and aesthetic creativity
- social projects
- and others

Thank you for your attention!
